

STEM GIRLS BOOKS™

RAP

Do you like science? How about technology?
Let me tell you something about engineering.

Math is fun, math is cool;
So listen up and learn all you can in school.

Because someday - one day - your creativity
Will envision new things that only you can see.

Like robots, rockets, medicines that heal,
New games, new toys, maybe automated meals.

Computers, airplanes, that visit other planets,
Super duper roller coasters; whatever you imagine!

It's called INNOVATION, and our nation needs you so.
There will always be a need for new things that go...

Faster, farther than we've ever been before.
There are no limitations on what you aim for.

It takes ideas, and smarts, and a little bit of art
To solve the problems that our world endures.

Like poverty, hunger, disease and more;
Better roads, stronger bridges...opportunities galore!

So if you want to make a difference in this great big world,
Explore exciting STEM fields for both boys AND girls.

Because it doesn't matter who you are or where you come from,
You can do big things and have a lot of fun!
